Please submit this form along with a **current transcript** (including courses in progress), and a **research proposal** (no more than 2 pages single-spaced).

Your proposal should include a detailed description of your **research plans** (an intellectual rationale for the project, and a list of specific sites, archives, and sources that you plan to consult – depending on your project, this may take the form of a preliminary bibliography, or a more holistically descriptive account of sources). Your proposal should also include a detailed breakdown of your **estimated budget** (including travel, lodging, research fees, and other anticipated expenses).
